1.THE COMPANY INTRODUCTION

► ABOUT US

Jinzhou Chengguang Power Supply Co., Ltd. is located in Jinzhou Economic Development Zone, Hebei Province. The first phase of the project covers an area of 150,000 square meters, with an annual expected production capacity of 10 million kVAh. It is one of the largest lead-acid battery enterprises in northern China. The company has advanced production equipment and a professional design team to create a variety of battery customization solutions for customers.

Chengguang Power focuses on battery production and has accumulated rich production experience and advanced technology. With a variety of plate production equipment, fully automatic tape production line, Chengguang realized the visualization of production management and control, high production efficiency, which make sure the lead strip is uniform thickness and excellent flexibility.

Besides, the grid manufactured by continuous expansion production line and advanced equipment has the characteristics of high strength and corrosion resistance.

The leading stretched plate production line realizes the intelligent automation from

stretching to coating, optimizes the production process management, and improves product stability. The battery plates have the characteristics of dense alloy structure, high plate strength and good consistency. The automatic lead strip production line combined with the flushing process greatly improves the production efficiency, and at the same time enables the battery to have a continuous and better start-up ability.

The company has a large-scale battery assembly production line, intelligent battery assembly line to ensure the process stability and quality reliability of battery production, independent research and development of traction batteries, valve-controlled sealed batteries, widely used in low-speed electric vehicles, golf carts, sightseeing coaches and other tram fields.

The company currently produces 3.5 million plates per day, and 30,000 batteries are assembled and produced. To achieve the ability to quickly match customer needs, to meet customer demand for large quantities of orders, the excellent technical team has formulated a complete control plan for the battery production process, comprehensively ensuring that various technical indicators of the battery reach the industry leading level.

Chengguang Power pays attention to product quality monitoring and has a complete quality assurance system. It has successively passed many certifications such as quality management system, IATF16949 automobile quality system, and China Classification Society Type Approval Certificate. Guarantee total quality control from raw materials to finished products.

Chengguang Power adheres to the business philosophy of quality first, customer first, and precise service, and is committed to building a leading enterprise in China's battery industry. Chengguang Power will join hands with you to achieve win-win cooperation and create brilliance together.

PRODUCT R&D CENTER

The excellent technical team has formulated a complete control plan for the battery production process to comprehensively ensure that the battery's technical indicators reach the industry-leading level, especially the appreciation space of this case, which is specifically reflected in the pricing strategy.

Chengguang Power Supply adheres to the business philosophy of quality first, customer first, and precise service, and is committed to building a leading enterprise in the battery industry.

Excellent quality authority certified

The company has a complete quality assurance system and has passed quality management system, environmental management system and occupational health and safety management system certifications.

Adhering to the business philosophy of quality first, customer first, timely supply and precise service, based on the business policy of lead-acid battery processing and manufacturing (OEM), we are committed to building a high-quality battery enterprise and continuously providing customers with high-quality products and services.

2. FACTORY TOUR

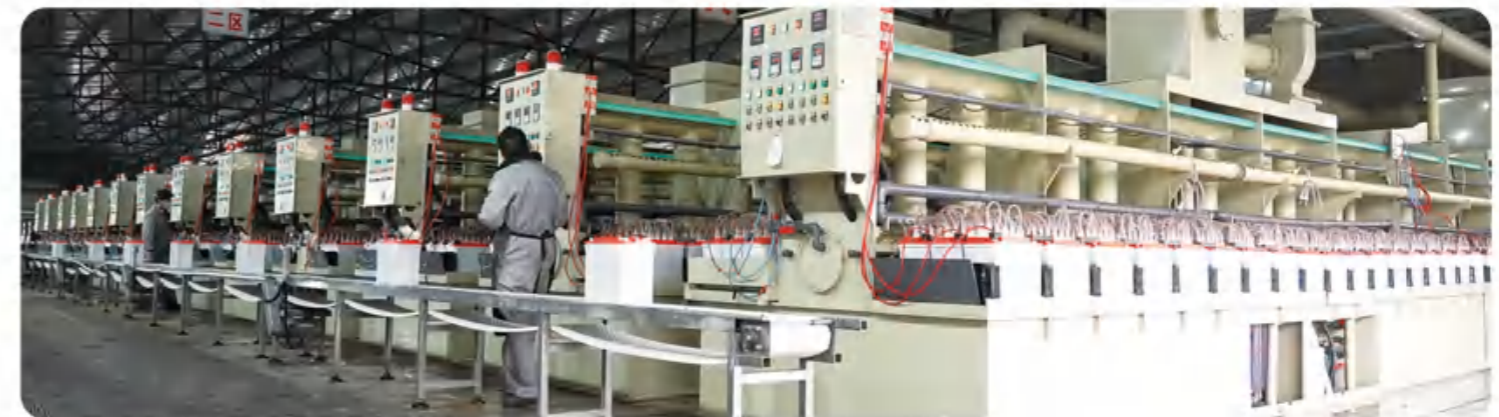

To improve the process of refine on

Chengguang Power focuses on battery production and has accumulated rich production experience and advanced technology. With a variety of plate production equipment, fully automatic tape production line, Chengguang realized the visualization of production management and control, high production efficiency.

Intelligent production management

Company introduction of professional and technical personnel, through independent innovation, to perfect construction of the enterprise as the main body, the market as the guidance, the combination of technological innovation system, a full set of advanced equipment, laboratory analysis, detection and other established research company with R&D products, we strictly control every link, ensure that the products of high quality and stability.

7.SALES AREA

Worldwide Sales Network

Except for beeing engaged in China market for more than 20 years , we also exported to the Middle East, Africa, Asia, Europe and the United States and other regions as well. We got a lot for trust and confidence from clients by continually improving the technology and enlarge produciton capacity .

QUALITY GUARANTED
